

Sujib Shrestha

Software Developer

Kathmandu, Nepal | sujeeb98@gmail.com | +977 9765973120 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software developer specializing in backend systems and GenAI integration, with full-stack range across React and Next.js. Builds RESTful APIs, real-time systems with WebSockets, role-based access control, and LLM-powered features — from database design through to production deployment.

PROJECTS

TableTap — Real-Time Restaurant Ordering Platform

Jun 2026

React, Node.js, Express.js, PostgreSQL, WebSockets

- Built a QR-based ordering platform where customers scan a table code to browse the menu, order, and pay from their phone, with orders synced live to the kitchen over WebSockets
- Designed role-based dashboards for waiters, kitchen staff, cashiers, and admins, each with scoped permissions and a dedicated view of live order state
- Implemented a sales analytics and profit-tracking module on top of the order data, aggregating revenue by item, table, and shift
- Designed the PostgreSQL schema for menus, tables, orders, and payments, with relational integrity across multi-table transactions
- Built JWT-based authentication with role-based access control, restricting each dashboard's routes and data by staff role

Repo: <https://github.com/SujibShrestha/TableTap>

SignBridge — AI-Powered Sign Language Translator

Team of 3

TypeScript, Python

- Built an AI-powered sign language translator with a 3-person team, winning the OrchidHackX Hackathon
- Used computer vision and machine learning to recognize hand gestures in real time and translate them into text/speech output
- Collaborated across a 3-person team under hackathon time constraints, owning the recognition pipeline end-to-end from prototype to demo

Repo: <https://github.com/DarkElixirRain/SignLanguage>

ACHIEVEMENTS

- Winner, OrchidHackX Hackathon — built an AI-powered sign language translator in a 3-person team
- Runner-Up, Hackaverse (ICT Meetup v8.0) — Prime IT Club / Prime College, September 2026

CERTIFICATIONS

- Oracle Certified Foundations Associate — Agentic AI, Oracle University, August 2026

SKILLS

Languages: JavaScript, TypeScript, Python

Backend: Node.js, Express.js, Django, REST API Design, WebSockets, JWT Auth

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Neon

Frontend: React.js, Next.js, TailwindCSS, HTML5/CSS3

AI & GenAI: LLM API Integration (GROQ/OpenAI), LangChain, RAG Systems, Prompt Engineering

Tools: Git/GitHub, GitHub Actions, Docker, Vercel, VS Code, Postman

EDUCATION

Bachelor in Information Management — Orchid International College, Kathmandu

Expected 2027

Relevant Coursework: Database Management, Web Development, Software Engineering, Business Statistics
